Art Unit:

***Claim Rejection under 35 U.S.C. 102(b)***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,5,6,10,12,14,16,17 are rejected under 35 U.S.C. 102(b) as being anticipated by Nelson et al (US 4,497,827; 2/5/85). Nelson discloses a pharmaceutical composition comprising arachidonamide. Nelson teaches a method of administering the composition to humans. See abstract, column 1 line 17-column 2 line 25, column 3 line 67 - column 4 line 14, column 12 lines 17-50. It is inherent that said administration of arachidonamide would inhibit anandamide transport.

***Obviousness-type Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit:

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,874,459. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the patent and instant application are administering to a human or animal the same compounds in a method for inhibiting anandamide transport.

#### ***Claim Objection***

Claims 2,4,7-9,11,13,15,18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claim. The prior art does not teach or suggest the limitations of these claims as they relate to what the applicant has elected.
